Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This application has been reviewed. Original claims 37 are pending. The rejection cited stated below.

Specification

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The subject matter "computer readable medium" in claim 37 lack proper antecedent basis in specification.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 37 rejected under 35 U.S.C. 102(e) as being anticipated by Wilson U.S. Patent Application No. 2004/0189720[hereinafter Wilson]

As per claim 17, Wilson discloses computer readable medium embodying instructions executable by a processor to perform a method for providing conversational communication with entities in a network, the method comprising the steps of: establishing connection to a distributed network using a client device (see paragraph 0022);

obtaining, by the client device, from a server in the distributed network a list of one or more entities in the network and a description of one or more commands associated with the one or more entities that enable user interaction with the one or more entities in the distributed network (see fig. 8 with list specific recognized commands) (see paragraph 0077079), wherein the commands are written using an interaction-based programming language which is independent of user language, access channel, client device I/O (input/output) modality, regional settings and international settings (see fig. 8 and paragraph 0088);

receiving as input, by the client device, a user gesture for communicating with a target entity(see paragraph 0077); and

processing, by the client device, the user gesture using transformation rules to determine a relevant command of the one or more commands and invoking, by the client device, the relevant command on the target entity (see fig. 8 and paragraph. 0022 and 0077 and 0094).

Conclusion
